

Pact for Sustainable Cybersecurity

A new initiative of

The founding members and adhering entities are committed to promoting the transition to a circular economy. Sustainable Cybersecurity circular economy through the following actions:

GOVERNANCE

Assuming the commitment to establish a solid sustainability governance at all levels of the organization.

Promoting responsible leadership that integrates social, environmental and economic aspects into strategic and operational decisions.

To be transparent in our actions and decisions related to sustainability, communicating in a clear and accesible way our policies, practices and performance. To be accountable to our stakeholders, encouraging participation and open dialogue.

TRANSPARENCY

ENERGY EFFICIENCY

Implement measures to reduce energy consumption in the systems and equipment used in the company. This may include adopting energy-efficient technologies and optimizing IT infrastructure. Be more energy efficient, reuse waste energy, such as heat, and using more renewable energy sources, with a view to becoming carbon neutral by 2030.

Incorporate a circular vision of resource use and waste generation, making a more efficient use of resources, minimizing those that are consumed and reincorporating into the production process those elements that can be used from waste.

ECONOMY CIRCULAR

**MANAGEMENT
RESPONSIBLE
MANAGEMENT
ELECTRONIC
WASTE**

Adopt responsible practices to manage e-waste generated by products and services. This involves promoting the proper recycling of electronic equipment, collaborating with organizations that specialize in e-waste recycling, and minimizing the generation of waste by extending the useful life of devices by extending the useful life of devices.

Participate in collaborative and outreach initiatives in the area of cybersecurity and sustainability. This may include collaboration with other companies, participation in working groups or dissemination of research and best practices.

**COLLABORATION
AND DISCLOSURE****SUSTAINABILITY
STANDARDS**

Actively participate in the definition of sustainable standards and regulations in the field of cybersecurity, thus contributing to the creation of a secure and sustainable environment in the digital world.

Work in collaboration with suppliers and supply chain partners to promote sustainable practices.

This involves evaluating and selecting suppliers committed to sustainability, and promoting transparency and communication about expected sustainable standards.

**COLLABORATION
IN THE SUPPLY
CHAIN**
